

## 36 Month QMHP & MCR Risk Assessment Comparison

April 24, 2019

|                    | <b>Year 1</b> | <b>Year 2</b> | <b>Year 3</b> |
|--------------------|---------------|---------------|---------------|
| Total Evals        | 200           | 254           | 264           |
| Total QMHP         | 129           | 99            | 73*           |
| Total MCR          | 71            | 155           | 191*          |
| Total Minors       | 47            | 55            | 82*           |
| Total Adults       | 153           | 199           | 182           |
| Total Males        | 101           | 99            | 130           |
| Total Females      | 99            | 155           | 134           |
| Total Hospitalized | 104           | 82            | 83*           |
| Safe At Home       | 96 (48%)      | 172 (68%)     | 181 (69%)     |
| Evaluation Minutes | 154           | 140           | 124*          |

Mobile Crisis Response was first available in April 2016. CACS completed 718 risk assessments between 4-1-16 and 3-31-19 (i.e. 36 months) without any adverse outcomes. Since June 2017 (when we started tracking severity), there have been 62 suicide attempts (as differentiated from gestures and statements). 35 of those were in Year 3.
