Subject: Legislature request

The legislature approved \$500,000 to be used by the South Dakota Ellsworth Development Authority. The authority has used \$50,000 of these funds to construct a training site in the existing Powder River Airspace. This site has already been used by the Air Force at least 50 times with an estimated savings of \$20,000 per sortie or approximately \$1,000,000 in operational savings realized by Ellsworth. Also, the Authority has used \$350,000 of these funds to match \$1,000,000 in federal funds to purchase properties that are deemed incompatible and are located in Accident Potential Zones at the end of the runway. \$100,000 of these funds remain unspent at this time.
