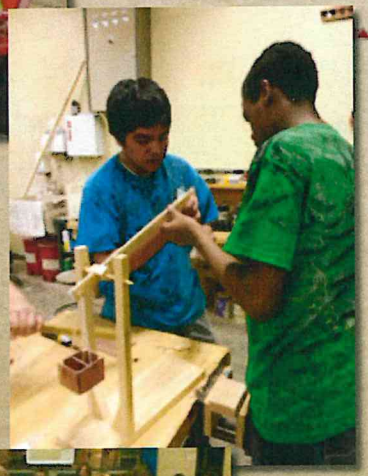
South Dakota Innovation Lab Schools



Armour
Bonesteel
Crow Creek
Lower Brule
Loneman

Marty Indian School
Pine Ridge
Platte-Geddes
Porcupine
Wessington Springs

For more information on how your school can get involved: Contact Dan Guericke @ Mid-Central Educational CoOp (605-337-2636)

What Does Being Part of SDIL Mean to My School?

Instructional Strategy

SDIL employ the instructional strategy of TPBL, Transdisciplinary Problem-based Learning that uses the universal systems approach for delivering and articulating problems, projects, and products. SDIL school faculties have the opportunity to attend intensive professional development where they are introduced to the step-by-step process of designing coursework for the academic year, aligning the projects and products to Common Core and Next Generation Science Standards, as well as building assessment tools and rubrics.

Collaboration

SDIL schools form a collaborative effort that shares resources and partnerships to better the rigor and delivery of education for South Dakota students. Community partners from higher education, industry and local organizations work with SDIL to insure that the programs are as robust as possible. SDIL works closely with the Department of Education to insure that all SDIL schools meet and exceed the educational expectations of our state.

On-going Support

Once schools join SDIL they have the opportunity to;

★ *Share resources*

★*Participate in Sanford Health PROMISE programs*

★*Join the weekly virtual brainstorm where teachers join the statewide cohort bringing forth and solving problems together*

★*Work with PAST STEM Coordinators in Intensive All-Day Professional Development at regular intervals through the year*

★*Work with PAST STEM Coordinators when they visit your school monthly*
