

**20:48:15:03. Limitations on multistate licensing privilege.** The board shall include, in all licensure disciplinary orders or agreements that limit practice or require monitoring, the requirement that the licensee subject to the order or agreement will agree to limit the licensee's practice to the home state during the pendency of the disciplinary order or agreement. This requirement may, in the alternative, allow the nurse to practice in other party states with prior written authorization from both the home state and such other party state boards. A nurse who had a license that was surrendered, revoked, or suspended, or who had an application denied for cause in a prior state of primary residence, may be issued a single state license in a new primary state of residence until such time as the nurse is eligible for an unrestricted license in the prior state of primary residence in which the adverse action occurred. Once eligible for licensure in the prior state of primary residence, a multistate license may be issued.
