This report is dedicated in memory of

REPRESENTATIVE

CRAIG TIESZEN

whose leadership and life’s work was spent working for a safer South Dakota

1949 ★ 2017
As we enter the fourth year since the PSIA was signed into law, we have seen several changes in the criminal justice system.

When the Criminal Justice Initiative Work Group submitted their report to the legislature, their recommendations focused on three main goals: improving public safety by investing in practices that have been shown to improve rehabilitation and reduce repeat offenders; holding offenders more accountable via strengthened community supervision; and reducing corrections spending and focusing prison space on violent and career criminals. I believe this report accurately depicts the current status of South Dakota’s progress towards reaching the Work Group’s three goals.

Unfortunately, not all of the results are as positive as we would have wished. Like our neighboring states, South Dakota has not been immune to the drug epidemic and the consequences of substance abuse and addiction is reflected in these pages. It is, and will continue to be, a struggle for our state.

However, as you view this report, you will notice that not everything is pessimistic. For example, while the prison population is higher than we projected, it is still lower than what the population would have been without the PSIA.

Probationers and parolees are earning thousands of hours of earned discharge credits. Offenders are successfully completing substance abuse treatment. When the Work Group projected the effects of the reform in 2012, there would have been no way to forecast what the drug impact would do to our citizens. The fact that we have had success stories despite the drug epidemic is a testament that while we are still far from our destination, we are on the right track.

As I enter my second year as chair of the PSIA Oversight Council, I would like to thank the Unified Judicial System, the Department of Social Services, the Attorney General’s Office, and the Department of Corrections for the countless hours they have spent over the past several years implementing and refining these reforms. I would like to thank the Pew Charitable Trusts, the Crime and Justice Institute, and the Department of Justice’s Bureau of Justice Assistance for their continued support of our justice reforms. Finally, I would like to thank the members of the PSIA Oversight Council for their unwavering dedication for improving public safety.

Respectfully submitted,

Laurie Feiler
Chair, Public Safety Improvement Act Oversight Council
Deputy Secretary of Corrections
South Dakota's law enforcement response to substance abuse is reflected in its statistics for Methamphetamine task force operations.*

2,681 arrests for meth-related offenses were made in 49 counties.

*Enforcement statistics current thru 9/30/17.

### 2017 Task Force Meth Statistics

<table>
<thead>
<tr>
<th>County</th>
<th>Arrests Reported</th>
<th>Lab Incidents Reported</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pennington County Meth Task Force-</td>
<td>692 Arrests</td>
<td>45,191.251g seized</td>
</tr>
<tr>
<td>Sioux Falls Meth Task Force-</td>
<td>1,173 Arrests</td>
<td>4,525.85g seized</td>
</tr>
<tr>
<td>Statewide-</td>
<td>816 Arrests</td>
<td>4,511.597g seized</td>
</tr>
</tbody>
</table>

Law enforcement seized over 54,228 grams of meth.
Key Takeaways

1. The prison population is 223 inmates below the projected population without the PSIA reform.

2. The majority of inmates in prison and court commits are nonviolent offenders. This is partially due to the increase in drug convictions resulting in a prison sentence.

3. The end of the year parole population is above Pre-PSIA numbers.

4. Since FY 14, parolees earned over 7600 years’ worth of earned discharge credits and probationers earned over 5700 years’ worth of earned discharge credits.

5. 57 percent of the individuals who began presumptive probation in FY 2014 successfully finished their term.

6. The capacity for Drug and DUI court has grown from 117 individuals to 445 individuals between FY 13 and FY 17.

7. Offenders in South Dakota successfully complete substance abuse treatment at a higher rate than the national average.

8. The number of probationers and parolees in treatment interventions increased by almost 50 percent.

9. Felony probation in the community increased 19 percent since the reforms took place.

10. Offenders who complete substance abuse treatment or criminal thinking treatment recidivate at a lower rate than the general Department of Corrections population.

Taxpayers have saved over $30 million due to the passage of the PSIA.
Financial Information

Taxpayers have avoided paying over $52,000,000 in costs since FY 14, avoiding Capital expenses of $36,000,000 and operating expenses due to prison days avoided.

The one-time and ongoing expenditures for FY 17 were $6,549,810.

Taxpayers have saved over $30,000,000 due to the passage of the PSIA.
The prison population is below the what it would have been without the reforms.

While the prison population is above the 2012 performance goal, it is still 223 inmates below what the prison population would have been without the PSIA.

*As of 6/30/17 there were 157 parole detainees, 47 in Extended Confinement, and 145 parolees in the Community Transition Program (CTP) included in the 3,913 count.*
Nonviolent offenders take up the majority of prison beds. The percentage of male inmates serving time for a nonviolent crime has returned to the pre-PSIA level. The percentage of female inmates serving time for a nonviolent crime has not changed since FY 16.
The majority of people entering prison are nonviolent.

The percentage of court commitments for nonviolent crimes has increased since FY 15.

In FY 17, 73 percent of male new commits were for nonviolent crimes, and 88 percent of female new commits were for nonviolent crimes.

Only 9 percent of male probation violator admits were doing time for a violent crime, and only 4 percent of female probation violator admits were doing time for a violent crime in FY 17.

*This chart is based on court commitments, which is both probation violations and new commits. The number of probation violation admits was 423 in FY 14, 426 in FY 15, 584 for FY 16, and 722 in FY 17.
New commits to prison for both males and females decreased.

The number of probationers and parolees being committed to prison as the result of a violation has increased every year since FY 15 for both men and women.

### Males
- **Probation Violations for Males**
  - FY14: 312
  - FY15: 312
  - FY16: 409
  - FY17: 489
- **Parole Violations for Males**
  - FY14: 602
  - FY15: 457
  - FY16: 502
  - FY17: 553

### Females
- **Probation Violations for Females**
  - FY14: 108
  - FY15: 114
  - FY16: 175
  - FY17: 233
- **Parole Violations for Females**
  - FY14: 116
  - FY15: 98
  - FY16: 113
  - FY17: 129
Parole Population
The end of the year standing parole population is above pre-PSIA numbers.

![Graph showing parole population from 2013 to 2017]

The average agent caseload is increasing, but still below pre-PSIA levels.
Smaller caseloads allow parole agents to strengthen community supervision by spending more time with higher risk parolees.
Since the passage of the PSIA, parole has discharged a total 7,671 years of unnecessary supervision through earned discharge credits (EDCs).

Over 86 percent of eligible parolees earned discharge credits (EDCs) through compliant supervision in FY 17.
Parole Violations

Violations of parole conditions result in high-level sanctions, which have increased since the passage of the PSIA.

Examples of a high level sanction include jail, house arrest, and treatment.

52 percent of the probation population is identified as being an administrative or low risk offender.

Felony probation supervision in the community increased 19 percent since FY 2013.

More of South Dakota’s nonviolent residents were held accountable in their own communities through increased use of drug and DUI courts, Hope probation, and evidence-based supervision.
EDC Probation

5,756 years of unnecessary supervision have been discharged since FY 14 through earned discharge credits.*

Around two-thirds of eligible probationers earned discharge credits through compliant supervision.

Combined, these individuals earned a total of 736,678 days of unnecessary supervision in FY 17.

*Only 6 months were measured in FY 14.
Presumptive Probation

 Judges deviated from presumptive probation 20 percent in FY 17.*
73 percent of individuals eligible for presumptive probation went directly to supervision.

Direct to Penitentiary, 20%
Direct to Supervision, 73%
Pending, 7%

57 percent of the 2014 Cohort and 45 percent of the 2015 Cohort successfully completed presumptive probation.

The results for each cohort will not be final until there are no more probationers appearing in a cohort’s "Active" column.

2014 Cohort
- Active: 4%
- Successful: 57%
- Other: 6%
- Revoked: 33%

2015 Cohort
- Active: 7%
- Successful: 45%
- Other: 7%
- Revoked: 41%

2016 Cohort
- Active: 30%
- Successful: 26%
- Other: 9%
- Revoked: 35%

2017 Cohort
- Active: 70%
- Successful: 4%
- Other: 2%
- Revoked: 24%

*The PSIA created a presumptive probation sentence for nonviolent class 5 and class 6 felonies. Courts may overcome the sentence despite the presumption. The deviation rate was projected to be 20%.

**Information in this graph is based on cohort and is likely to change as individuals finish probation.
The number of participants in the HOPE Probation program has grown since FY 2014. Currently, HOPE Probation is available in the First, Fifth, and Sixth circuit. People have been held accountable on probation in the community, rather than prison, with frequent and random urinalysis testing, and probation supervision.

In FY 17, 21 individuals successfully completed HOPE probation.

With the majority of the individuals still in the program, the final successful completion rate cannot be calculated at this time.
Drug and DUI Courts

Less than 20 percent of individuals who were active in Drug or DUI Court in FY17 were terminated, while 20 percent graduated.

Since over 60 percent of the individuals from FY17 are still active in the program, the completion rates will change.

The capacity to serve clients in Drug and DUI Court increased since the passage of the PSIA.
South Dakota's completion rates for substance use disorder treatment (CBISA) are higher than the national average.

47 percent of individuals who participated in South Dakota’s substance use disorder treatment successfully completed the program, compared to the national average of 44 percent.

MRT services had a 42 percent increase in clients served while CBISA had a 53 percent increase in clients served.

South Dakota’s Substance Abuse Treatment (CBISA) and Criminal Thinking (MRT) completers have a lower recidivism rate than the overall DOC population released in 2015.*

National Substance Abuse Treatment Data consists of all individuals who received substance abuse treatment which includes criminal justice and non-criminal justice involved clients. This does not include Criminal Thinking Treatment Data.

National Data Source: SAMHSA (2016). Treatment Episode Data. Treatment Episode Data System (TEDS)

*Based on 1-year adult recidivism data.
Jail Days

The total number of days spent in county jail for felony sentencing decreased.

The average number of days an individual spends in county jail for a felony sentence has remained stable.

The average time an individual spends in county jail for a felony sentence has remained stable since FY 16, following a decrease between FY 13 and FY 16.

*This excludes county jail sentences where the time to be served is entirely suspended and any days received as credit for time-served prior to sentencing.
Membership of the Oversight Council

Laurie Feiler (Chair)  
Department of Corrections

Greg Sattizahn  
Unified Judicial System

Bruce Hubbard  
Defense Attorney

Judge Jeff Davis  
Seventh Judicial Circuit

Patrick Weber  
Governor’s Office

Aaron McGowan  
Minnehaha County State’s Attorney

Amy Iversen-Pollreisz  
Department of Social Services

Judge Patricia Riepel  
Second Judicial Circuit

Representative Karen Soli  
House of Representatives

Mark Smith  
Board of Pardons and Paroles

Representative Steven Haugaard  
House of Representatives

Senator Troy Heinert  
State Senate

Senator Jordan Youngberg
